A child is waiting for you *right now*

On any given day, thousands of Florida children are unable to **live safely at home** ... at least for a little while.

These children – victims of abuse, neglect and abandonment – find hope, healing and safety with **caring foster families**.

Right now, children in our community need a loving foster home ... **there simply aren't enough**.

Will you open your heart and home to a child who needs you?

“Watching them thrive ... to see them go from where they were when they came into our home to where they are now ... it's amazing. They're little miracles.”

—Melanie
foster parent

Traditional foster care

Most children who have been removed from their homes will find safety in traditional foster care.

Training and ongoing support prepares foster parents to understand common behaviors and to best help children work through pain and confusion as they look toward brighter, safer tomorrows.

Medical foster care

In addition to traditional preparation, foster parents who care for kids in the Children's Medical Services program receive specialized training to provide for the unique medical needs of children in their home.
