

Community Solutions

Community Solutions differ based on the distinct needs of each community.

Community Partnership Schools address the needs of students, families and their surrounding community. Unlike traditional schools, Community Partnership Schools offer counseling, on-site food pantries, parent resources and more.

With programs like YouthWorks, CHS offers mentorship and professional development experiences that connect teens with education and employment pathways.

Our unique program Tech Success, created in partnership with leading tech giants, offers Florida youth access to the latest technology and tech training to bridge the digital divide and prepare teens for success.

All of our solutions are created through community partnerships and focus on reshaping the future for children.
