# CRAFT BRIGTHER FUTURES

## Create your own pinwheel instructions

You will need: a pencil with an eraser, a ruler, scissors, blue sheet of paper, and a push pin
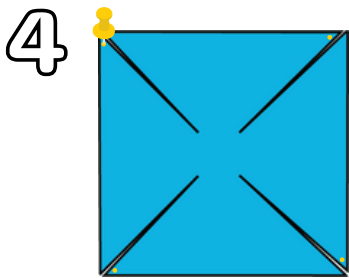

**1** Cut your paper into an 8.5x8.5 inch square.

2 With your pencil and ruler, draw a diagonal line from each corner to form an X.
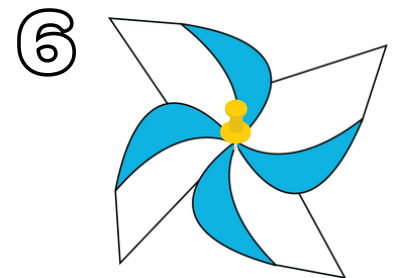

3 Cut along these lines towards the center, stopping an inch away from the center.
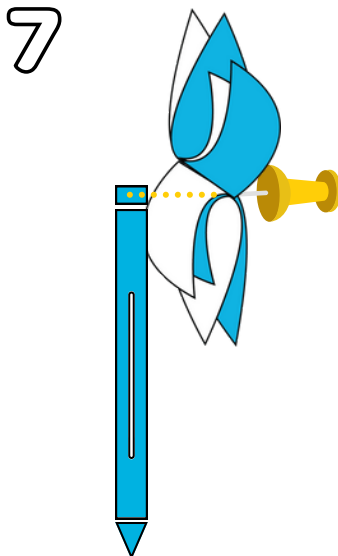

4 Use your push pin to make a tiny hole at the top left corner of each cut section.

5 Gently bend (be careful not to crease) the left corner of each section to the center.
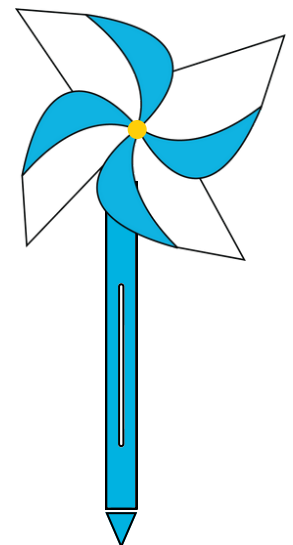

6 Poke the push pin through all the holes to hold them together.

7 Carefully push the push pin into the side of your pencil eraser.

Optional: Cut out the CHS logo or star and put it in the center before you stick in the pin!

Take a fun photo with your pinwheel, share on social and tag @HelpFLKids!
